The structure of the working groups of the Nursing Research Network, formed in 2021, was introduced.

According to the Secretariat of the National Iranian Nursing Research Network based in Tabriz, Dr. Leila Valizadeh, Head of Nursing Research Network, announced that in order to organize the performance based on the principle of participation and according to the various activities and functions of the Nursing Research Network, the formation of different working groups in the network was put on the agenda and therefore at least 8 working groups were set up. In order to benefit from the existing potentials in the network and outside it, permanent members of the working groups are chosen voluntarily based on personal experience and interest from the members of the Strategic Council and the Research-Educational Council and invited members from the General Assembly and outside it will also attend the meeting of the working group as appropriate. In addition to reviewing the status of the network, the working groups plan, act and report the necessary activities.

Permanent members are from the Strategic Council and the Educational Research Council. (The invited member will also attend the working group meeting as appropriate)	Nursing Research Network Working Groups
