

### [The fourth meeting of the "Updating the website of the Nursing Research Network in both Persian and English" working group was held](#)

According to the Secretariat of the National Iranian Nursing Research Network based in Tabriz, the fourth meeting of the "Updating the website of the Nursing Research Network in both ... Persian and English" working group was held virtually on Saturday, December 30th

According to the Secretariat of the National Iranian Nursing Research Network based in Tabriz, the fourth meeting of the "Updating the website of the Nursing Research Network in both Persian and English" working group was held virtually on Saturday, December 30th, 2021 at the Tabriz Faculty of Nursing and Midwifery.

In this meeting, due to the recent call for advertising the country's nursing research centers and the readiness of the poster introducing the research centers, it was decided to complete and update this module on the network's Persian website. The names of the related centers and posters and the links of their websites should be visible in that section.

Also, due to obtaining a license for the English website from Tabriz University of Medical Sciences and according to a survey of members of the Strategic and Educational Research Council working group the "About the network", "Network elements" and "News" sections were given priority in translation. Research priorities and other sections will be translated in the next steps and uploaded to the English website.
