

[The sixth and seventh meetings of the "Development of research priorities of the Nursing Research Network and related monitoring" working group were held](#)

According to the Secretariat of the National Iranian Nursing Research Network based in Tabriz, the sixth and seventh meetings of the "Development of research priorities of the Nursing Research Network and related monitoring" working group were held on Saturday, December 11th

According to the Secretariat of the National Iranian Nursing Research Network based in Tabriz, the sixth and seventh meetings of the "Development of research priorities of the Nursing Research Network and related monitoring" working group were held on Saturday, December 11th, with the presence of the members of the working group and the esteemed chairman of the network.

At the beginning of the meeting, Dr. Valizadeh greeted the audience and presented a summary of the activities related to the working group and also presented the list of stakeholders according to the report of the stakeholder working group and the approval of the strategic council of the network. They also read the report of the secretariat related to the methods of determining research priorities by nursing research centers throughout the country. Following the meeting, Dr. Azadi presented a table summarizing the number of priorities announced by the Nursing Research Centers of the whole country, in which 247 research priorities were proposed. The method of classification of 247 recently prioritized research priorities from 18 research centers was discussed and it was decided to analyze by directional content analysis method with the possibility of creating more categories as well as determining sub-categories.
